PART IV.

Produce Export Section

On the following pages will be found lists of the principal exporters of a wide variety of agricultural produce arranged alphabetically by commodities. We are indebted to the Department of Trade and Commerce, Ottawa, for their co-operation in supplying the nucleus of this section. We have added considerably to it and have increased its scope by listing various export merchants, forwarders and other classes of business associated with the export of produce.

We trust that the inclusion of this section will make the CANADIAN TRADE INDEX a new medium of communication between intending importers the world over and the Canadian producers and exporters of agricultural produce.

GUIDE GUIDE

Indice Commercial

Canadien

2ème PARTIE

Commençant à la page 161, sur papier bleu, se trouvent les noms et les adresses des manufacturiers.

3ème PARTIE

Commençant à la page 287, se trouve une liste alphabétique des articles fabriqués au Canada, donnant les noms de toutes les maisons qui les fabriquent.

Le mot principal en Anglais est ordinairement placé le premier, suivi d'une phrase le modifiant, i.e., Quincaillerie, de construction: Cuir, coupe de bottines et chaussures; Enseignes de toile et fibre. Mais, quand l'inversion ne semble pas faisable le mot modifiant est placé le premier, et est ainsi arrangé dans la liste alphabétique, i.e., Mécanisme de piano—Piano hammers; Shoe packs—Chaussures en cuir tanné à l'huile. En cas de doute on peut essayer les deux méthodes. Quand deux noms ou plus sont communément employés pour le même article, nous avons essayé de donner des explications vis-à-vis. Quand on desire l'adresse de la rue, voir la IIème Partie, commençant à la page 161. Les noms des fabricants qui font ou sont intéressés dans le commerce d'exportation sont indiqué par un astérisque*.

4ème PARTIE

Commençant à la page 647. Section Spécial indiquant les noms des exportateurs principaux des produits de la ferme, etc.

5ème PARTIE

Commençant à la page 655 sur papier bleu. Section de Traduction—(a) Français, page 655. (b) Espagnol (édition limité), page 697. Les noms des articles donné dans l'Indice Français et Espagnol sont suivis par leur équivalent en anglais, et l'équivalent en anglais se trouve placé alphabétiquement dans la IIIème Partie.

FROM the giant generators which develop Canada's tremendous water power resources to the tiny fuse plugs which ensure electrical service to home and industry—Canadian General Electric produces in the Dominion "Everything Electrical".

General Electric motors drive the wheels of Canadian industry. And General Electric home appliances cook meals—keep foods healthfully fresh—sweep the floors,—wash and iron clothes—tell accurate time—provide tonic indoor sunshine—and bring a world of entertainment to the home.

Thus the G-E monogram is a symbol of service—a mark of dependability on "Everything Electrical".

RUBBERSET BRUSH!

THE greatest compliment a product can have is to be imitated. The most widely imitated paint brush or shaving brush in the world is the Rubberset. Over 50 years ago our inventive genius produced the Rubberset process. Others have never been able to catch up. The difference may not show on the surface. It does show in the result. Sell the genuine. Make sure Old Man Rubberset is in the trade-mark. Correspondence invited from jobbers and dealers in Canada and other parts of the world.

Presenting . . . for your information . . .

A list and brief description of QUIGLEY PRODUCTS

(Our literature gives detailed information . . . write for booklets on products in which you are interested.)

QUIGLEY REFRACTORY CEMENTS AND PLASTICS

HYTEMPITE . . . plastic, air-setting high temperature cement recognized the world over as the standard material of its kind. Use Hytempite to lay up fire brick with thin, strong, air-and-gas tight joints; for protective surfacing over new or old walls; for building monolithic GAS/TITE Baffles; for pointing up and repairing furnace brickwork, and for all kindred purposes. "The Universal Furnace-Room First-Aid."

PYRO-MORTAR . . . a dry refractory cement of exceptional characteristics, made to conform to U.S. Bureau of Standards specifications and tests. Especially adapted for laying up fire brick with troweled joints.

MONO-LINE . . . the Quigley plastic fire brick—a highly stable plastic refractory for building complete one-piece furnace linings; for refractory fill and backing in water walls, and for repairing burned out or fallen sections of furnace walls. Mono-Line forms a solid, monolithic structure that is air-and-gas-tight, and practically neutral as to expansion and contraction.

Q-CHROME . . . neutral-base refractory cement for bonding, repairing, and "chromenizing" (protective surfacing) of furnace walls. Q-CHROME is a chemically neutral refractory cement—highly resistant to slagging and abrasion—and withstands higher temperatures than are normally produced in any kind of fuel-fired furnace.

CAST-REFRACT . . . castable refractory—a new type of refractory which can be cast or molded on the job in any desired shape or form. Air-sets quickly with great structural strength—can be put under full heat within 24 hours or less if necessary. Especially adapted for forming special shapes and furnace door linings, and for replacing more or less intricate refractory construction. Durable, economical, easy to use. Temperature limit 2600 °-2800 °F.

CHROMIX . . . plastic chrome fire brick—a plastic, neutral-base super-refractory for monolithic construction and repairs—wherever extreme temperatures and destructive chemical, slagging, or abrasive conditions are encountered.

QUIGLEY GUN . . . shoots refractory mixtures **of the proper consistency for the job.*** With the Quigley Gun, you can repair a whole battery of furnaces in the time formerly required to repair one. Its many uses include filling cracks and holes in furnace walls; protective surfacing over new or old furnace walls; repairing leaky baffles, and building new monolithic baffles that are air-and-gas-tight. FORCE-FEED (no suction). Because of force of application, make it possible to patch furnace linings while hot. Functions with long extension nozzle Operated by compressed air. High and low-pressure models

QUIGLEY TRIPLE-A PROTECTIVE COATINGS

TRIPLE-A PROTECTIVE COATINGS are technical products which give real protection under conditions that quickly destroy ordinary paints. They are highly stable, chemically neutral, non-oxidizing, have unsurpassed waterproofing qualities, and resist the action of acids and alkalies. Used in thousands of plants. If you have a corrosion problem, investigate TRIPLE-A.

No. 10 Black . . . for steelwork, bridges, stacks, etc.
No. 20 Railroad Black . . . for heavy duty applications.
No. 44 Aluminum Vehicle . . . for steelwork, tanks, bridges, etc.
No. 111 Di-Electric Black . . . for inside of water tanks, etc.
No. 100 Series Colours (Twelve) . . . protect and decorate all surfaces.

OTHER PRODUCTS

Q-SEAL . . . plastic expansive joint sealing compound. "High-pressure steam, oil, acid, and chemical-proof".
HYDRO-SEAL . . . waterproof joint sealing compound.
CORNELL FLUXES . . . a complete line of foundry fluxes.

MICROMETER ACCURACY
for Industrial Weighing

Accurate weighing is of paramount importance today—anything less than accuracy is guesswork. "Approximate weight" or "about the right weight" are words which *dare* not be applied to weighing operations.

With the Toledo Scale Company, accuracy means *accuracy*—just that and nothing less—with no compromise or reservations.

And this is one of the reasons why, in the short span of thirty years, this company has grown to be the largest manufacturer of automatic scales in the world — a position which never could have been attained if Toledo standards of accuracy had ever been lowered.

Toledo Model No. 1821
Portable, an accurate, dependable all-purpose scale.

TOLEDO SCALES

MADE, SOLD AND SERVICED BY CANADIANS

There are Toledo automatic dial scales for every known weighing operation—portable scales . . . bench scales . . . over-head track scales . . . floor-type scales . . . conveyor scales . . . hopper scales . . . hanging scales . . . auto truck scales . . . printing scales . . . mailing scales . . . person weigher scales and precision devices for weighing, measuring, classifying, testing and counting.

Secure a BETTER WORKING LIGHT in Your Plant Interior

This two-coat paint job will do it and cost of artificial lighting will be materially lessened. First—a coat of Sherwin-Williams Wall Primer and Sealer to seal the surface TIGHT and prime it, in the one operation. Then—a coat of Sherwin-Williams Mor-Lite in Gloss, Flat or Egg-Shell White.

That's all. Just the two coats. And the plant interior is entirely rid of dark corners. The "working light" is better and your artificial lighting costs are materially lessened. For Mor-Lite reflects the light entering the plant and its clean, white finish is not affected by the action of steam or moisture.

Even on rough surfaces the one coat of Wall Primer and Sealer will suffice. There will be no suction or dead spots to mar the finishing coat of Mor-Lite.

Specification booklet describing this money-saving, two-way painting system will be sent on request without obligation.

METALASTIC PAINT

A metal protective paint perfected in the Sherwin-Williams laboratories. Has an extremely tough film to resist abrasion. Its splendid covering capacity and the supreme protection it provides make Metalastic the one best choice for structural steel and metal surfaces.

REFRACTORIES

The solution of individual problems in the application of refractories is an outstanding factor in Sternson Service. And, while there is no panacea among refractories, Sternson practical experience has developed a standard line among which are:

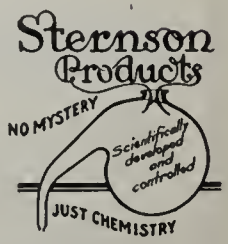
STERNSON NO. 30,—high temperature cement, air sets, welds fire brick. Shipped ready for use as mortar.

STERNSON NO. 35,—for the many needs of the foundry, cupola and ladle linings, spouts, etc. Gas plants are large users.

STERNSON NO. 40,—Plastic Fire Brick for industrial furnaces and firebox linings. Creates one piece linings of exceptionally long life.

STERNSON NO. 50,—a super refractory with silicon carbide base. Self bonding. Will stand the temperature of the oxy-acetylene flame.

STERNSON NO. 60,—a super refractory with chrome base. Plastic.



SUNDRY REFRACTORIES,—Fire sand, silica flour, fire clay, chrome mixture, crushed fire brick, etc.

STERNSON SEALTITE,—an asbestos coating for boiler brickwork. Saves hundreds of dollars in preventing lost heat.

STERNSON SEALASPH,—the perfect roof treatment, impervious to wind, rain, snow and sun. Protects absolutely the material on which it lays.

STERNSON FEED WATER TREATMENT gives boiler security.

SILICATES OF SODA,—for all purposes. Sternson specializes in the application of all grades of silicates of soda.

Sternson Structural Specialties

A complete service to the Building Industries and Building Maintenance Departments covering all types of waterproofings, floor treatments, preservative and restorative materials such as: asphaltic coatings, integral admixtures, chemical hardeners and metallic type waterproofers and hardeners.

Sternson Laboratory Service

is based on one of the most modern industrial research laboratories in Canada. In this exceptionally equipped and well staffed department, Sternson Research is helping many Canadian industrial units in the development of their product; in reducing manufacturing costs and in research aimed to safeguard the future. Ask us to explain how this department can be useful to you.

What "KODAK" Means

As a word, a trade-name, "Kodak" is simply an arbitrary combination of letters.

As a trade-mark, "Kodak" indicates certain of the products of the Kodak Companies to which it has been applied, as, for instance, Kodak Cameras, Kodak Film and Kodak Film Tanks.

An an institution, "Kodak" stands for leadership in photography. To the world at large it is best known for its simplification of photography for the amateur, for its Kodak and Brownie Cameras, for its films and papers. To the professional photographer, it is known for its progressive leadership in the manufacture of everything that is used in the studio. In the cinema world it is known as the producer of the film that made the motion picture possible. To the scientist, it is known for its X-Ray products, now so vital in the mending of men.

In 1888, when the two "k's," the "o," the "d," and the "a" were euphoniously assembled, they meant nothing. Today they mean protection for you in the purchase of photographic goods.

If it isn't an Eastman, it isn't a Kodak

How the Canadian Manufacturers' Association Can Assist Members in their Export Activities

THE Constitution of the Canadian Manufacturers' Association which was organized in 1871 and incorporated by Act of Parliament in 1902 provides that "The Objects of this Association shall be to promote Canadian industries and to further the interests of Canadian manufacturers and exporters, and to render such services and assistance to the members of the Association and to manufacturers and exporters generally, as the Association may deem advisable from time to time."

The assistance which the Canadian Manufacturers' Association gives to exporters might be classified under two headings: specific and general.

The Association is in a position to render the following direct assistance.

1—*Empire and Foreign Tariffs*:—The Tariff Department keeps up-to-date and accurate information respecting customs tariffs, customs and consular regulations and invoicing requirements of all countries. Particular study is given to tariff preferences within the British Empire, forms of certificate of origin, and to the percentage of Canadian content required in order to qualify for such preferences. The Tariff Department also advises members respecting the export drawback allowed by the Canadian Government.

2—*Commercial Reports on Overseas Firms*: The Association furnishes free of charge, to members of the Association commercial reports on overseas firms with whom they may contemplate doing business.

3—*Transportation and Ocean Rates*: The Transportation Dept. of the Association supplies information on rail and ocean rates, steamship services, routing, shipping documents, parcel post, trade terms and definitions.

4—*Enquiries from Foreign Countries*: As the organization has up-to-date information in regard to Canadian manufacturers, enquiries which are received from abroad for Canadian products are placed before firms likely to be interested.

5—Each year a large number of responsible buyers and agents from abroad visit the offices of the Association, and are put in touch with Canadian manufacturers.

6—The Association co-operates very closely with the Commercial Intelligence Service of the Department of Trade and Commerce. They notify members when Trade Commissioners are visiting Canada, arrange appointments, and advise members of the assistance which this service provides.

How the Canadian Manufacturers' Association Can Assist Members in their Export Activities

7—*Translation Service*: A translation service is at the disposal of all members of the Association. Letters in practically all languages are translated and facilities provided for translating English letters into foreign languages.

8—*General Information*: Information is also given in regard to coding and deciphering cables; names of consuls throughout Canada; figuring C.I.F. prices; statistics of exports; electric currents in various countries; advice on export procedure and particulars of foreign currencies.

Under general, or indirect aids we might mention:

a—Keeping members constantly advised of changes and developments in the regulations and laws of overseas countries which might affect their interests.

b—Co-operation with the Canadian Government Exhibition Commission in the organization and administration of exhibitions abroad where Canadian products are exhibited. During the last few years, the Association has assisted in the organization of the New Zealand and South Seas International Exhibition at Dunedin; the British Empire Exhibitions at Wembley; the British Empire Trade Fair at Buenos Aires, and the Canadian Section of the British Industries Fair which is held each year at Olympia and Birmingham.

c—Assistance in the organizing of properly sponsored trade tours to various markets.

d—The publication of books and pamphlets relating to export methods and procedure and general publicity in regard to the development of Canadian export trade.

e—Administration of Export Clubs and arranging of the Export Courses.

f—Publication of the Canadian Trade Index which gives a classified and alphabetical list of the manufacturers in Canada and is distributed throughout 75 countries. This book is used as a basis of information by importers, agents and merchandising concerns abroad and is available in the offices of public libraries, shipping companies, banks, industrial organizations and Chambers of Commerce in overseas countries. The Index contains a special export section giving data in regard to methods of conducting export trade, foreign financing and an analysis of Canadian trade.

CANADIAN TRADE INDEX ADVERTISING

The next two pages of Canadian Trade Index give you an alphabetically arranged index of the firms who have supplemented their listings in this edition with display advertising, which you will find most informative and valuable. Many of these advertisements are profusely illustrated and together they give an imposing picture of the extent, variety and high character of Canadian manufactured products that will repay your most careful study.

The individual advertisements are further made readily accessible to you in seeking Canadian sources of supply, by the addition of the page number of the advertisement immediately after the name of the advertiser wherever listed, either in the alphabetical or classified sections, thus making available to you more extensive data with regard to the advertiser and his products just when you require it.

Canadian Trade Index is issued in an edition of 11,000 copies—5,000 for distribution abroad through the co-operation of the Department of Trade and Commerce at Ottawa—and 6,000 in Canada by the Canadian Manufacturers' Association, and is recognized as the authoritative source of information on what is made in Canada and who makes it, and renders an invaluable service in promoting the sale of Canadian products at home and abroad.

Net advertising rates are: Page—$100; Half Page—$60; Quarter Page—$35.

All Canadian manufacturers are invited to make use of the advertising service provided and to reserve their advertising in the next (1934) edition without delay.
